Balloons from the Heart of Europe!

FLY AT A NEW LEVEL

KUBICEK BALLOONS, based in the Czech Republic, has more than 20 years of experience and tradition of building hot air balloons. Aleš Kubíček, an aeronautical engineer, and his experienced and enthusiastic team build a comprehensive range of traditional balloons, special shapes and hot-air airships for clients throughout the world. KUBICEK BALLOONS not only build baskets, burners and envelopes, but also manufacture the fabric from which the envelopes are made. KUBICEK POLYESTER is a high tenacity double coated fabric with improved resistance to short-term overheating.

Our baskets are made of the highest quality cane with ash runners and marine ply floors, strengthened by a stainless steel frame. Baskets have an internal height of 110 – 120 cm. Top frames are covered with soft suede (in standard colours brown, black, blue and red) and the base frames by tough cowhide. Internal padding is in red, blue or black with other colours by request. The external measurements in this leaflet have a tolerance of +/- 5 cm.

Unlike other manufacturers our basket prices include: a fire extinguisher, a fire smothering Nomex sheet, a first aid kit and a handling line all individually bagged within the basket. There are karabiners for the basket wires, and burner poles and covers in their own bag. Red, blue or black basket rope and red, blue or black colour of inside equipment available as standard.

BASKET OPTIONS

- Coloured cane stripes.
- Cushion floor.
- Side wall cushion.
- Waterproof basket covers.

TYPE	SIZE (cm)	PERSONS
